

Navigating the Cloud: A Roadmap to Seamless Migration and Cost Efficiency

Introduction

At SKYXOPS, we believe cloud management should be simple, cost-efficient, and a catalyst for innovation. Our automated solutions and FinOps-driven approach ensure you maximize returns on every cloud investment, empowering you to focus on what you do best. As certified partners with AWS, GCP, and Azure—and active members of the FinOps community—we seamlessly merge finance and engineering expertise to help your business thrive in the cloud. Our offering includes:

Comprehensive Migration Process

We define and enforce each step to maximize efficiency and cost savings right from the start.

Advanced FinOps Technology

Our **SKYXOPS Orbit** platform provides real-time insights and actionable recommendations for continuous improvement.

Hands-On Expertise

The **SKYXOPS Edge** team collaborates with you through planning, implementation, and optimization—ensuring a seamless transition and ongoing innovation.

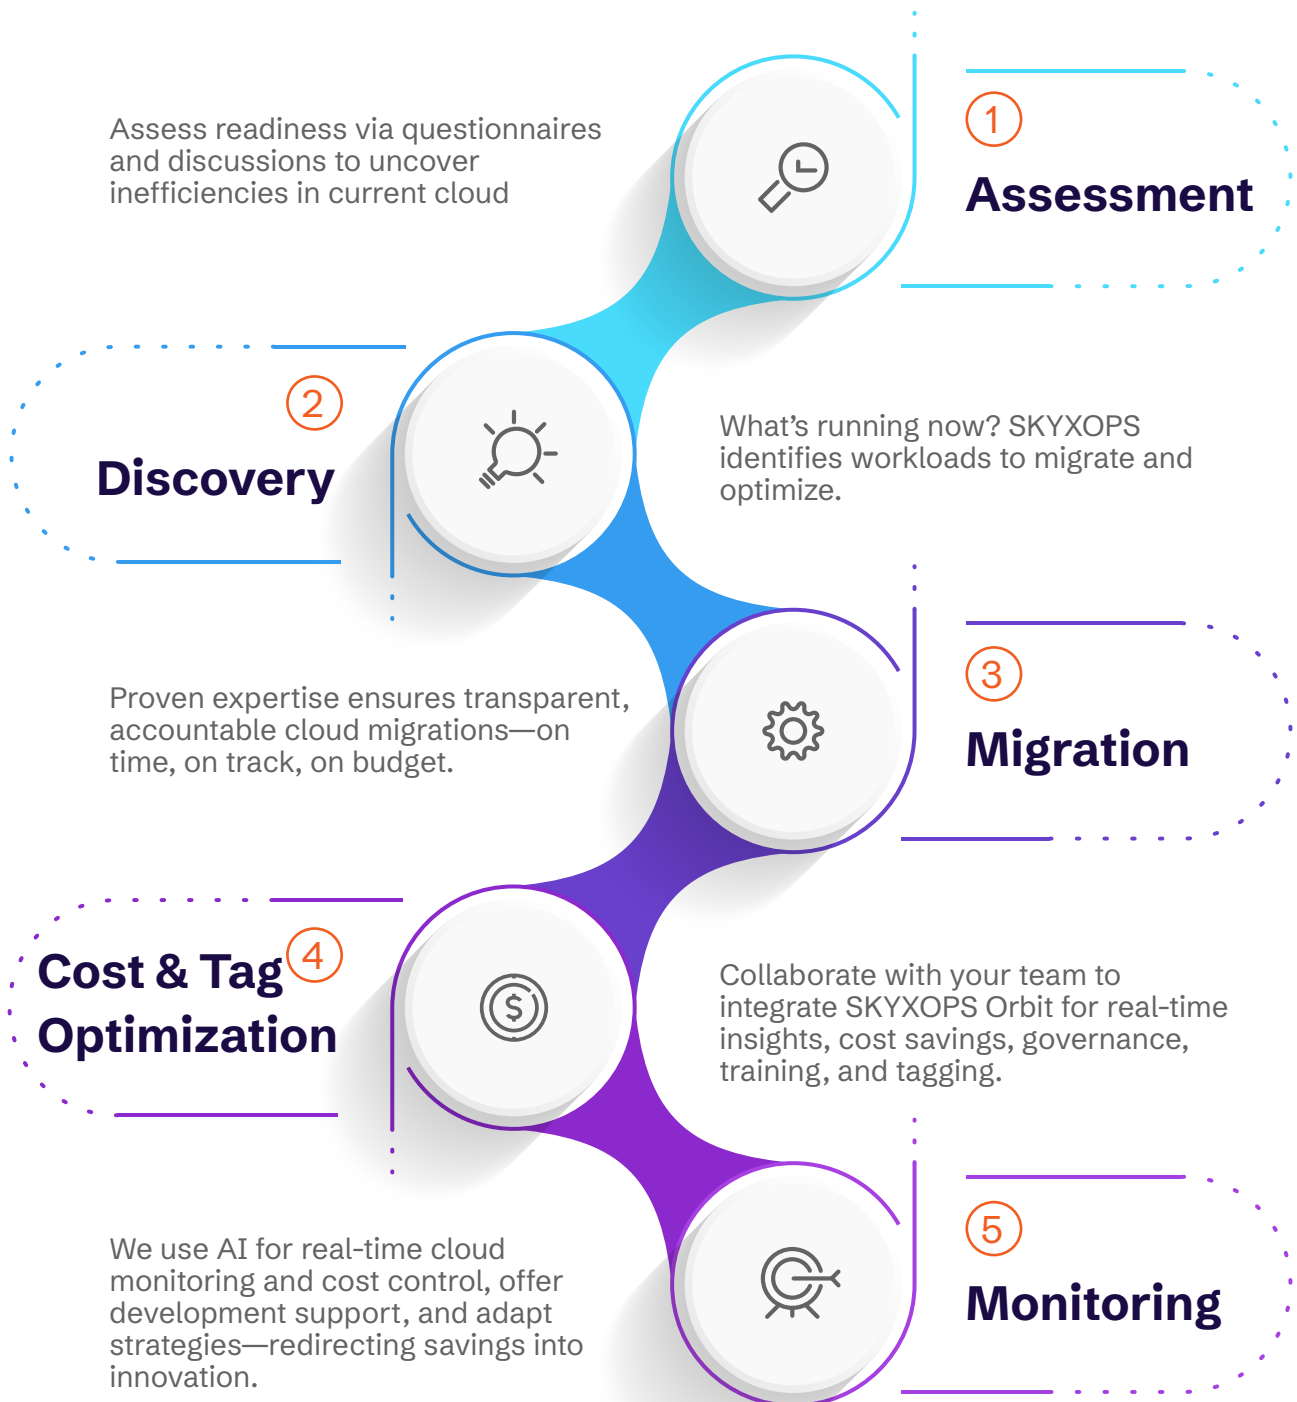

Immediate Cost Optimization

Every migration includes access to Orbit, making sure every cloud dollar delivers measurable returns.

Between 15% - 25% of customer workloads are typically determined to be redundant following the SKYXOPS Edge discovery and assessment process, allowing customers to resize or retire them—and ultimately save money.

What is SKYXOPS Edge migration and cost optimization process?

Who can benefit from SKYXOPS Edge?

IT teams are often so busy managing their existing tech stack that they rarely have the bandwidth to explore strategic upgrades or optimizations. The SKYXOPS migration process tackles this problem by offering clear recommendations for evolving your systems and a step-by-step roadmap to achieve a cost-optimized cloud environment.

SKYXOPS Edge may be especially helpful if you answer “yes” to any of these questions:

- ✓ Are you relying on outdated or failing hardware without a budget for refresh?
- ✓ Do you have seasonal workloads that would benefit from scalable pricing?
- ✓ Is your organization running 20+ year-old mission-critical applications?
- ✓ Is your cloud spending rising uncontrollably, or do you suspect hidden costs in your multi-cloud setup?
- ✓ Is your data center located on valuable real estate that could be repurposed more effectively?
- ✓ Are you uncertain about how to optimize resource usage and reduce waste across multiple clouds?
- ✓ Do you lack a reliable DR plan to safeguard and rapidly restore systems and data?
- ✓ Do regulatory or compliance demands overwhelm your current infrastructure?

If any of these challenges resonate, SKYXOPS Edge can modernize your IT landscape, help you adopt cost-optimized cloud solutions, and ensure that you're ready for the demands of tomorrow.

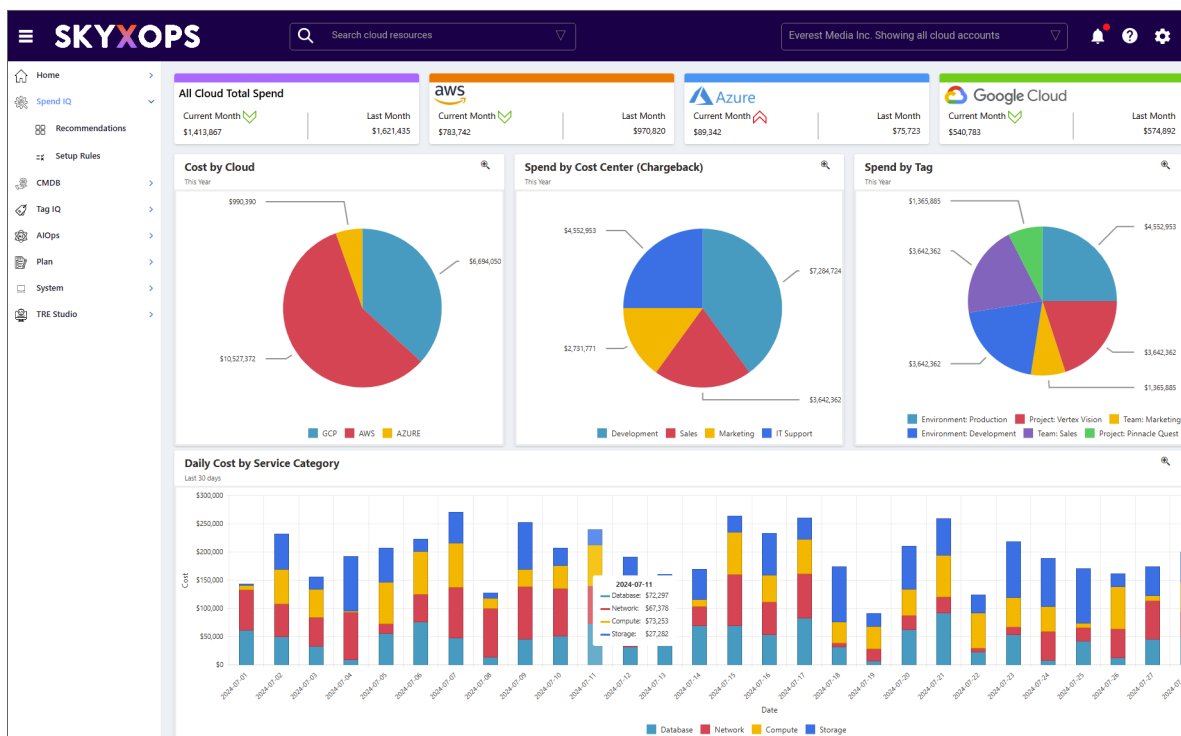

Visualizing Success

Imagine a cloud strategy where:

- ✓ Teams are equipped with actionable insights for informed decision-making.
- ✓ Resources are fully utilized to eliminate waste and drive impact.
- ✓ Cloud spending directly supports innovation and business objectives.

SKYXOPS Orbit: Cloud Cost Optimization Platform

SKYXOPS takes the mystery out of cloud migration:

Moving to the cloud can be overwhelming. SKYXOPS removes the guesswork, offering clarity for questions like:

- How do we map every detail of the migration?
- How do we organize and track each step?
- How do we ensure accountability and transparency at every stage?
- How do we identify hidden cost savings and eliminate waste?
- How do we optimize cloud spend to enable innovation and stay competitive?
