

Make Cloud Cost a **Decision**, Not a **Bill Shock**.

Know what every deploy will cost **before it ships**. Govern the bill from pull request to **month-end close**, across AWS, Azure, and Google Cloud.

SKYXOPS prevents overspend at the pull request, monitors every cloud daily, optimizes with AI-ranked savings, and governs tags and chargeback — all in one platform.

MONITOR

Daily telemetry. Every cloud. Every team.

- Multi-cloud aggregation across AWS, Azure, Google Cloud
- Persona dashboards for CFO, Eng, FinOps, DevOps
- Anomaly detection · AI/LLM & GPU cost tracking
- Slack, Teams, email alerts routed by ownership

OPTIMIZE

LLM-powered savings, ranked by impact.

- Rightsizing · idle & zombie cleanup · storage tier
- RI / Savings Plans / commitment recommendations
- GPU optimization for AI / LLM workloads
- Realized-savings tracking with audit trail

GOVERN

Tags, attribution, showback, audit.

- Tag-IQ enforcement at PR-time + post-deploy
- Hierarchical budgets · multi-dimensional attribution
- Showback & chargeback finance can sign off on
- CSV audit exports · cloud resource inventory

PREVENT

Cost Guardrails — every cost decision, made at the pull request.

- IaC cost projection (Terraform · CloudFormation · K8s/Helm)
- Native CI/CD: GitHub Actions · GitLab · Azure DevOps · Jenkins
- Budget-aware approval routing & deny signal
- CLI · REST API · read-only by design

CAPTEL

Contact center · AWS

28% cost reduction across Amazon Connect, EC2, and S3 voice-recording storage

WelTex

Manufacturing · AWS + GCP

30% cost reduction · 100% tag coverage across multi-cloud

Prime Shipping

Logistics · Tri-cloud

40% less time on day-to-day cost ops; 24/7 expert support model

FREE 30-DAY COST ANALYSIS

See SKYXOPS on your stack → www.skyxops.com/#get-started

Read-only IAM · No production access required · Deploy in under 24 hours · 15–25% savings typically identified in 30 days
